

# Peak Performance: Rise Above With Agile, Customizable Networks

## Dedicated bandwidth that drives scalability and reliability

Southwest businesses that embrace the newest connectivity options will be poised for growth in the coming year and beyond. But those that remain stuck in the status quo may find priorities like security, innovation and speed impeded by outdated infrastructure.

Don't let a business-hindering network limit your potential. New fiber connectivity options exist in southwest Florida, and **your building has been designated for significant infrastructure upgrades.**

We know you can't afford to let opportunities and advantages pass you by. Set a meeting with our Florida-based engineering team today. We'll discuss where you're at, where you're headed and how we can help.

### Network Snapshot:

- ▶ **2,700+ route mile network** distributed across Florida
- ▶ Reliable Core Network providing **99.999% availability**
- ▶ Core & Edge Network occupying **88 facilities**
- ▶ Florida Intercity Network offering **400 Gbps** capability through 64-channel reconfigurable optical add-drop multiplexer (ROADM) powered by Ciena

## How We're Different:

### Purpose-Built Networks

Don't rely on a residential patchwork of aging infrastructure for your connectivity. Built specifically to support businesses, our fiber network provides access to faster and more reliable broadband connections.

### Speed, Scalability and Reliability

Upload content and access the cloud faster than ever before. Enjoy flexible capacity to meet your ever-changing business needs. Breathe easier knowing built-in redundancy has even your most sensitive data and transactions covered.

### Deep Product Offerings

Whether you need data, voice, video or high-speed internet services, Summit can support your initiatives with product offerings for unique use cases. Think you're already covered? Get a back-up circuit that's just as reliable as your primary – if not more.

### We're Florida

From our most senior leadership to the installation teams and customer service, we are your neighbors. We're based in Florida and take pride in providing local expertise and perspective. No distant HQ or outsourcing here.

### Point-to-Point Ownership

We own and operate our own fiber networks, so you're never at the mercy of third-party stakeholders or customer service. We're in control of our business, so you can be in control of yours.

### Customized for You

Custom doesn't have to be complicated. We take pride in being the opposite of one-size-fits-all thinking. Because we own our network, we can build a customized network to meet your demands and quickly adjust when needs change.

## About Summit Broadband:

Summit Broadband is a leading fiber-optics telecommunications provider in Florida with over a decade of experience. We provide data, voice, video and high-speed internet services to Florida businesses of all sizes. From initial meetings and strategy to design and deployment, our team is dedicated to crafting a customized solution for your business.
